Chlorine

Added to all municipal water supplies, this disinfectant hardens arteries, destroys proteins in the body, irritates skin and sinus conditions, and aggravates asthma, allergies, and respiratory problems.

Chloroform

This powerful byproduct of chlorination causes excessive free radical formation (accelerated aging), normal cells to mutate, and cholesterol to oxidize. It's a known carcinogen!

DCA (Dichloro acetic acid)

These chlorine byproducts alter cholesterol metabolism and have been shown to cause liver cancer in lab animals.

MX (another chlorinated acid)

Another byproduct of chlorination, MX is known to cause genetic mutations that can lead to cancer growth and has been found in all chlorinated water for which it has been tested.

Proven cause of bladder and rectal cancer

Research has proven that chlorinated water is the direct cause of 9% of all bladder cancers and 15% of all rectal cancers in the United States.

"... you absorb more chlorine in a 10 minute shower than by drinking 8 glasses of the same water!"

"Tests show that your body can absorb more chlorine as a result of a 10 minute shower than if you drink 8 glasses of the same water. How can that be?"

"A warm shower opens up your pores, causing your skin to act like a sponge."

"As a result, you not only inhale the chlorine vapors, you also absorb them..."
